Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 22 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Hebert et al (US 5,878,818).

The reference member is met by the whipstock 9, which provides reference to window location and angular orientation. The anchor member is met by anchor 14 for anchoring the whipstock 9. The steps of setting the reference member and the anchor member are anticipated by col. 5, lines 45+. The well toll is met by milling tool 1 shown in Fig. 1A. The anchoring member is also anticipated to be able to withstanding all of the compression, tension and torque generated during the milling operation, such forces are anticipated to occur during mechanical maneuvering of the milling tool, which is operated at the surface.

Response to Arguments

Applicant's arguments filed on August 12, 2004 have been fully considered but they are not persuasive. Examiner disagrees with applicant's assertions that Hebert teaches first setting an anchor member and then using a whipstock that is attached to the anchor to further set the anchor. More specifically, applicant is reminded that the

Art Unit: 3672

language "setting" has several meanings, among them are "to put in a designated position", and "to put into a secured position" (see Webster's II New Riverside University Dictionary). Without further structural or functional distinction as claimed, examiner is correct to interpret the respective claim(s) as first calls for "putting the reference member or the whipstock within the cased borehole" and then "securing the anchor member in the cased hole", which are clearly anticipated by Hebert et al.

Allowable Subject Matter

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-19, 25-36 are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
